

support for economic developers

As an economic development professional, you play a critical role in strengthening your community by helping commercial property owners, non-profits and municipal buildings make needed upgrades, reduce operating costs, and improve long-term resilience.

Connecticut Green Bank is helping strengthen local communities through clean energy and resilience solutions. The Green Bank is here to serve as a trusted resource and partner to economic developers, including through:

1. Educational Support:

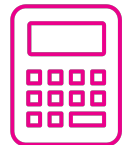

We offer foundational training to help you understand our Building Solutions programs — including C-PACE financing. These sessions help you quickly get up to speed on:

- Property and customer eligibility
- Eligible improvements
- How projects move from idea to completion
- Customer stories and examples you can share with local businesses.

2. Tools & Resources

Economic developers often serve as the first point of contact for property owners exploring upgrades. We provide a suite of tools and hands-on support to make those conversations easier and more productive. Customer stories, process explainers, program one-pagers and more are available. We also offer no-cost assistance to help you host C-PACE workshops for your constituents.

3. Direct Support for Projects and Property Owners

We can help your property owners understand program benefits, eligibility and confidently move forward with:

- Access to Green Bank Contractor Network
- Preliminary project financing and feasibility reviews
- No-cost energy assessments for eligible properties
- Coordination with partner programs and technical experts

4. Ongoing Partner Support for Economic Developers

We stay engaged with you throughout the year through program updates, customer stories, webinars, newsletters, events, collaborations, and one-on-one meetings with a dedicated Green Bank point of contact.
